

Secured 1 st Rank in 3 rd Semester (B.Tech) (94.5%)		Tech Club President (B.tech DA)		All Rounder, B.Tech DA Batch	
Professional Summary					
B.Tech candidate specializing in Data Analytics with proficiency in Data Analytics, DBMS (SQL), Machine Learning, and Computer Vision. Certified in Supervised Machine Learning from Stanford Online Coursera. Demonstrates strong analytical skills, problem-solving abilities, and a comprehensive understanding of data-driven decision-making. Results-oriented with a keen eye for detail and a proactive approach to delivering insights that add value to organizational objectives.					
Educational Background					
Degree		Year		Institution/ University	
B.Tech (Data Analytics)		2023 -2027		SAGE University, Bhopal (Sunstone Eduversity)	
Class XII M.P Board		2022		Model Hr. Sec. School Civil Lines, Rewa	
Class X M.P Board		2020		Model Hr. Sec. School Civil Lines, Rewa	
Projects					
Exploratory Data Analysis on World Population, Dec 20'24		- Conducted EDA on global population using Python (pandas, NumPy, Seaborn) and interactive Plotly.Express choropleths. - Visualized continent-wise growth trends and spatial demographic shifts over time. - Key insight: Asia’s population leads; Africa’s rapid growth foreshadows a mid-century demographic shift.			
Real-Time Object Detection, April 20'24		- Built real-time object detection system using YOLOv8 Nano and OpenCV; optimized frame-wise processing and confidence thresholding. - Handled model integration and scalability for performance-critical environments. - Demonstrated capabilities in deep learning, OpenCV pipeline optimization, and object detection frameworks.			
Netflix Dashboard		- Designed an interactive BI dashboard to analyze and narrate global viewing patterns on Netflix through genre, content trends, geography, and ratings. - Transformed raw data into insightful visual stories, highlighting user preferences and platform evolution using dynamic visuals. - Power BI, Python (pandas, matplotlib), Jupyter Notebook for data preparation and analysis.			
Certifications			Skills		
- Supervised Machine Learning: Regression and Classification Certification, Stanford University Online Coursera, 20 May 2025. - Fundamentals of Python Certification, Ace Academy, 15 October 2024 - Object Oriented Programming Certification, Ace Academy, 30 May 2024			Technical Skills		Soft Skills
			- Tableau, Power-BI - MS Excel - Python, C++ - SQL - Machine learning - Computer Vision		- Effective Communication - Detail Oriented - Critical Thinking - Problem solving
Positions of Responsibility					
- Led the Tech Club as President managing 2 successful Tech events at campus. - Led the Sports Mania 2024 event at Campus. - Team Leader in JLU 2.0 Hackathon, Driving Collaborative Innovation and Strategic Problem Solving to Compete in a University-Wide Tech Challenge.					
Achievements & Extra-Curricular Activities					
Workshop		Spearheaded Microsoft Excel Workshop Empowering Interdisciplinary Students to Develop Data Management, Analysis, and Visualization Skills with 50+ Attendees.			
Student of the Year, 2024		Honored with the 'Student of the Year 2024' Award for Exemplary Academic Performance, Leadership, and Holistic Contribution to University Life.			
Competitions		Secured 1st Position in the University Cricket Championship, Demonstrating Tactical Prowess, Team Leadership, and Athletic Excellence.			
Peer to Peer Learning		Facilitated Peer Learning Session as an Instructor on the Data Analytics Life Cycle, Showcasing Practical Skills in Data Cleaning and Visualization for 70+ Interdisciplinary Participants.
